

Stamping Practice High Performance Stamping

This book is a partial translation of the original German 13th edition by Matthias Kolbe **Stanztechnik | Grundlagen -Werkzeuge - Maschinen** published by Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in 2020.

Target group:

- ▶ Trainees and students of Mechanical Engineering and Automotive Engineering
- ▶ Practitioners and designers of production and stamping technology

Brief description:

1st Edition

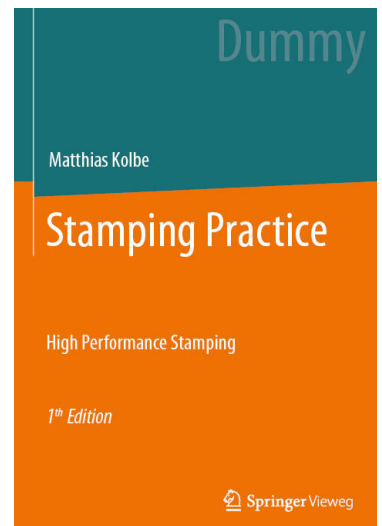

This English-language textbook and professional book provides an overview of the basics of stamping technology, practical tips for the design of tools and explanations of the high-performance stamping presses. Design rules and parameters from practice provide assistance in the construction of tools. The computational determination of influencing variables, basic material technology and functional relationships support the selection of high-performance stamping presses. There is also a special chapter about optical monitoring of stamping tools and stamping processes.

Author:

Prof. Dr.-Ing. Matthias Kolbe teaches forming and cutting technology, highspeed forming processes at the West Saxony University of Applied Sciences in Zwickau, Germany.

Topics:

- ▶ What does stamping technology offer the global economy?
- ▶ Stamping technology processes and terms
- ▶ Materials for stamped parts
- ▶ The basic principles of shear cutting
- ▶ Composite tools
- ▶ Criteria for high-performance dies
- ▶ Monitoring stamping tools (Otto Vision)
- ▶ High-performance stamping presses
